EvoNergie utilizes HEPA-filtered, contained equipment, ensuring the facility's indoor air does not become re-contaminated by the dirt and debris just removed.

EvoNergie Service Technicians are certified and trained to provide your facility with the services needed to inspect, maintain and restore mechanical systems to a healthier environment. EvoNergie IAQ diagnosis and consultation with your facilities managers and air balance firms ensure solutions to you concerns.

CALL **EVONERGIE** IF YOUR HVAC SYSTEM IS:

Contaminated with an accumulation of particulate

A source of unacceptable odors

Discharging visible dirt or debris into the conditioned space

Contaminated as a result of smoke, fire or water damage

Has been infested with birds, rodents, insects or their bi-products

Has become contaminated with construction debris

Mold contamination is suspected

Deterioration of fiber glass duct liner or ductboard is suspected

Your building is part of a proactive energy management program or to achieve LEED Certification
